I started to think differently after this project. I became more curious about language learning. I became more ambitious about learning English. I think it feels great to communicate with a foreign person, to share the same language with him/her and to be able to understand each other. To know a different person, to learn a different language, to learn about a different culture is a kind of opportunity for me. It will be a source of happiness for me to give information about my own culture, my religion, my language and my people. I want to show them the kindness and hospitality of Turkish people when they come to my country. I think it will also increase my own knowledge about so many things. My behaviors and attitudes in my daily life affect my success in school. Going to bed early and getting up early makes me fresh in school. I think, being careful about our daily life affects our school life.

With this Project, I understood the effect of Daily life on lessons and success better. If I make my daily life more systematic, my school success becomes more systematic. I became more curious about learning different languages and different cultures. In this Project, some of our friends had a chance to go abroad, and this is very important for both our school and our friends.

In this Project, we make some homework and this makes our free times more useful and more fun. Learning their daily life and culture causes some changes in our lives. We are making more researches to learn about their life. I understand that we have to learn some basic things to communicate with a foreign people of a foreign culture. Now, I am really waiting for them to come.

Canan Duran
With this Project, I understand that friendship has no rule. Whatever your nation, your language or religion is, you can have a lifelong friendship. Moreover, I have an opportunity to improve my foreign language which is a popular all the world. I realise the importance of it. By means of the Project, I also have a chance to introduce my lifestyle, my culture, my country, my cuisine, folk dance and music. Thank you.

Numan ÇAVUSOĞLU AND10-B
With this Project, I have an opportunity to express my feelings in English. Going abroad is a different adventure for each student because it is hard to have such a chance. When I go to this country, I feel myself as a part of there except for the language problem. Whenever I think about this Project, I am excited because it has developed my language skills and I learn lots of things about group work. Finally, I would like to thank all the people who organize it.

Salih DOGAN
I have learned lots of things by the means of this project. At first, by doing questionnaires and searching the effect of the daily life on success and surely with the help of my teachers, I have a daily schedule in the end. Now, having breakfast is part of my life 😊

Secondly, I have a desire to learn new languages such as Spanish etc. Also, I have information about the national food and culture of partner countries. Moreover, we prepare performance tasks about folk dance, flags, national anthem of the partner countries so I enrich my geographical and historical info. And my first goal in the future is going abroad and enrich my life as soon as possible.

If there is an ongoing Project in your school, you can have lots of advantages. Here is the list:

At first, I start to interest in the languages and I am practising my English recently. Moreover, I have learned about partner countries after visiting partner schools because our teachers put a lot of interesting information and pictures about this schools and countries in the school bulletin board.

Secondly, we have a chance to learn about different school systems so we compare ours to different systems of partner schools. We exchange experiences by asking questions to the student who visit partner countries. Also, we have a lot of fun when guest students come to our school. We sing songs and dance altogether. It has a positive impact on our school community making our school more attractive for us.

Finally, it improves cooperation between students because we prepare so many things altogether before the Turkey visit at school. Thank you for everything.
